Our Ref FOI 2024-1001

Dear XXXXX,

I write in connection with your request for information dated 13th November 2024, concerning handheld breath testing equipment and procedures.

I am required by the Freedom of Information Act 2000 to handle all requests in a manner that is blind as to the identity and motives of the requestor. Any information released as a response to a request is regarded as being published and therefore in the public domain without caveat.

Following receipt of your request, research was conducted by the Roads Policing Unit at Wiltshire Police.

Your request for information has now been considered and I am able to respond as follows.

You wrote and our response:

Please advise what make and model of hand held alcohol breath testing equipment Wiltshire police use.

Envitec Alcoquant 6020+ (Plus)

I would be grateful if you would share the checklist and procedure for roadside breath tests. Particularly those measures employed to prevent sample contamination and erroneous readings which would lead to wrongful arrest.

The device does its own checks and will signify it is ready to use unless it provides an error.

Officers have to follow the manufacturers guide, which can be accessed using the following link (page 18 is of note) - [AlcoQuant 6020 plus - Operating Manual](#). Officers should ensure the subject has not had an alcoholic drink within 20 minutes prior to the test being taken. If so, they should wait for a statutory 20 minutes before taking a sample.

Samples can only be contaminated from Alcohol or Ethenyl, either in or on the subject. This does not include aftershave / perfume, unless used immediately before.

Erroneous readings can only occur if the user or subject does not follow the 20 minute guideline.

The following link may also be of further assistance - [Alcohol and drug driving | Wiltshire Police](#).

Yours sincerely,
